

AVIGILON™

Avigilon Unity Video & Unity Access integration

Smarter. Safer. Together.

Unify your Avigilon video management software and access control to gain a complete picture of your security environment.

Instantly verify if the person seen carding in on camera matches the ID photo associated with their access card. You can then lock or unlock the door right from your Unity Video dashboard.

From the same Unity Video dashboard, you can search for that person by using the Identity Search feature.

Using the video from the most recent time the person carded in, you can easily use Avigilon Appearance Search™ technology to identify their current location on-site or review their previous whereabouts. It's that simple.

Unity Access Features

Interactive Scenes

Visualize your security environment with customizable views and dynamic icons. Bring Scenes into Unity Video and gain instant situational awareness and insights to enable faster responses and smarter decisions.

Streamline alarm management

Manage alarms using color-based priority indicators and audible alerts and view live and recorded video.

Powerful Search

Avigilon Appearance Search technology sorts through hours of video with ease to quickly locate a specific person or vehicle of interest across an entire facility in near real-time.

Focus of Attention Interface

A cutting-edge user interface for live video monitoring that leverages AI and video analytics technologies to determine what information is important and should be presented to security operators.

Combined for a Powerful Security Solution

Identity search

Efficiently locate a specific person of interest on your property. Run an Avigilon Appearance Search using the Unity Access cardholder information to determine the person's current or previous location on site.

Quick Action

Help keep your people and properties safer with rule-based actions and notifications for on-site responses, including sitewide lockdowns, allowing you to respond quickly and effectively.
